

Guest Lecturer – Jamie Williams
Monday 3rd June 2024

Jamie Williams is a multi-award-winning magician and magic creator, AIMC and has lectured both UK and abroad. His lecture has been highly praised by some of the legends of magic including Jay Sankey and Craig Petty and he has consulted on tv and films in both magic and (unbelievably) stunt performance.

Jamie's magic lecture is full of easy to do, visual magic that he has worked (and worked and worked and worked) at numerous events each and every week that led Craig Petty to state "you have created more commercial magic than any other magician in the last few years".

Jamie is also an expert in micro expressions and body language having studied it over twenty years and worked in law enforcement and organised crime investigation since 2021 and will share how he uses these skills in his Mindreading.
