

Oliver Meech: The Effervescent Lecture

A celebration of creativity

Discover why Craig Petty calls Oliver “one of the most creative magicians on the planet”. About 10 years’ on from his bestselling Plot books, Oliver is back with a new lecture, sharing material from his new book, along with some old favourites.

Expect fresh plots, streamlined methods and playful audience interaction. You’ll learn a variety of tricks – mostly using cards, with a couple of exceptions. Several are ‘scalable’ from close-up to parlour/stage, and nothing’s too knuckle-busting. Oliver will also share some tips and techniques to inspire your own thought bubbles. All in all, it’s a fun-filled evening of fresh magic.

As Liam Montier says in his quote for the book:
“Oliver manages to be both creative and practical, a rare combination ... A great book, and an appropriate title, as it will make your brain fizz!”
